Claims 1-25 (CANCELLED)

26. (CURRENTLY AMENDED) A method for context personal browsing comprising:

　　providing a remote computer system, the remote computer system receiving data from a client computer system having a browser companion agent including one or more one associated service modules that assist a user of the client computer system by providing services that are contextually relevant to content on a browser on the client computer system, the data received bv the remote computer system being determined according to the content page present on a browser of the client computer system ~~and/or the user associated with the client computer system~~;

　　determining from the page data at least one set of data ~~and/or~~ or executable code that corresponds to a service module associated with the browser companion agent; and

　　sending the data or code to the browser companion agent for use by a service module; wherein the browser companion agent determines contextual relevance by coupling to a browser on the client computer system via an application interface.

27. (ORIGINAL) The method of claim 26 wherein the service module is one or more of a form filling service, a transaction tracking service, and a comparison shopping service.

28. (ORIGINAL) The method of claim 27 wherein the browser companion agent includes at
